

NSP IT Update - April 2017

Since Jan'17 significant enhancements/improvements have been implemented to the NSP Website. Monthly updates have been provided to the National Board & Division Directors for distribution to membership. Below list some of these continued improvements:

Implemented since Jan '17

Improvement/Enhancement	Description
Instructor Activity Log	Self-Auditing report that instructors can update/maintain & export to provide to IT for recertification.
Closed Course Report	Leadership now has the ability to run a closed course report for their Division/Region
Unassigned Member Report	Leadership now has the ability to run a report to view unassigned members with search criteria
Expanded Roster Report – Phase I	Leadership has an expanded roster report providing additional requested member information.
Secondary Rosters	Ability for a PR/PD to add/remove members from Secondary Rosters
Update Candidate to Patroller	PR/PD has the ability to now update a candidate to a patroller
RD/SC/ARD	Run Division Treasurer Report and filter out region financials. This is available as the “Region Treasurer Report”

Areas currently in review for decisions/action by the IT Committee specific to additional improvements are listed below:

Improvement/Enhancement	Description
Expanded Roster Report – Phase II	Add additional education information for Roster Report for Leadership. This will include Education Info such as OEC & Refresher.

Significant Enhancements have been approved by the board for funding. These will be starting in April '17 with all being completed by August 1, 2017. We are not planning on any significant changes to the environment after August 1, 2017 so we can maintain stability for the next season. The enhancements are listed below:

Enhancement	Description
System Upgrade	This is an internal iMIS upgrade providing internal fixes to processing issues. One are being correct is email notification to membership from the website. This has been inconsistent due to iMIS bugs that will be addressed with this upgrade.
Instructor Trainer outside Division	This will allow the ability for an IT to be selected from outside Division including Geographic & Pro Division
Bill Division & Region Dues for Purchased Lifetime	Division & Region dues will be able to be collected form members that purchased lifetime membership
Billing when area pays for members (Mixed Billing) – Mixed payment for Registration.	Modification to registration will be done to accommodate the ability to support patrols where the area pays for some or all of their patrollers

It has been agreed to by the IT Committee that we do not have the metrics to justify the expense to incorporate Billing for Secondary registration. Additional there is not consistency between divisions for this process. Lastly, we are reviewing options for an eblast solution. Currently, we do not have one, nor do we expect one to be implemented in the next fiscal year. We understand the need for this, and are looking at what our options are as well as costs.
